PROFESSIONAL SUMMARY

Software Engineer with 3+ years of professional experience building web applications with React.js, Next.js, TypeScript, and JavaScript (ES6+). Experienced in developing responsive interfaces, reusable UI components, and REST API-integrated features for financial, administrative, and competition management platforms. Skilled in Tailwind CSS, Bootstrap 5, and modern web development tooling, with a foundational background in PHP, Node.js, and MongoDB, and hands-on mobile development experience with React Native. Proficient in AI-assisted development with Claude (Claude Code) and Cursor across multiple AI models, using AI agents to accelerate delivery while thoroughly reviewing, testing, and refactoring all generated code before release.

WORK EXPERIENCE

Web Developer
Aug 2024 – Present

BIM Ventures — Saudi Arabia (Remote)

- Develop web pages and application features using Next.js, React.js, and TanStack technologies.
- Build responsive, user-friendly interfaces aligned with product requirements.
- Implement application functionality using JavaScript (ES6+) and TypeScript.
- Integrate REST APIs and maintain reusable, well-organized code across web applications.
- Use AI coding agents (Claude Code, Cursor) with multiple models to speed up feature implementation, then review, test, and refactor the generated code for quality, performance, and maintainability.
- Use Claude Code as an AI agent to plan features, scaffold components and API integrations, refactor existing code, and debug issues, reviewing every change through Git diffs before committing.

Teaching Assistant
Oct 2022 – Aug 2024

Information Technology Institute (ITI) — Qena, Egypt

- Supported instructors with lesson planning, course preparation, and technical learning activities.
- Helped students build software-development skills through practical support and technical discussions.
- Reviewed assignments and evaluated student work against course requirements.
- Facilitated hands-on sessions and laboratory activities.

Instructor (Concurrent Role)
Jul 2023 – Sep 2023

Orange Digital Center (ODC)

- Delivered software-engineering training in C++.
- Taught Object-Oriented Programming (OOP) concepts and programming fundamentals.
- Provided technical instruction across multiple governorates.

SELECTED PROJECTS

FLOWI — Spend & Approval Management Platform

- Worked on a web platform for employee spending requests and multi-level approval workflows.
- Contributed to modules covering request types, budgets, vendors, tax rates, users, and system integrations.
- Used Claude AI agents to speed up request, budget, and approval screens, then reviewed the code.

WAFRA — Personal Wealth Management Platform

- Worked on a financial tracking platform for monitoring personal assets and financial accounts.
- Supported asset tracking across bank accounts, stocks, ETFs, bonds, Sukuk, cryptocurrencies, real estate, vehicles, private companies, and collectibles.
- Contributed to transaction-history views, financial charts, and dashboard data visualizations.
- Used Claude to accelerate dashboard and chart components, validating all generated code for accuracy.

SEEC — Competition & Program Management Platform

- Worked on Customer, Judge, and Admin applications supporting competition workflows.
- Supported team management, multi-step applications, judging, scoring, inquiries, complaints, feedback, reminders, and startup management.
- Built features including real-time chat and phone/email verification.
- Used Claude Code and Cursor to deliver multi-step forms and chat features faster, with full code review.

ZATCA — Participant & Program Management Platform

- Worked on Customer, Judge, and Admin applications for participant, team, program, and evaluation management.
- Supported workflows for registration, team management, idea submissions, requests, evaluations, reporting, stages, groups, question sets, and judge assignments.
- Used Claude AI agents to build and refactor Admin and Judge modules, reviewed against project standards.

Personal Mobile App — React Native (Personal Project)

- Built a small personal mobile app using React Native.

TECHNICAL SKILLS

Front-End:	React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3
Mobile:	React Native, Cross-Platform Mobile Development
UI & Styling:	Tailwind CSS, Bootstrap 5, Responsive Web Design
Libraries & Tools:	TanStack, Formik, AJAX, Webpack
APIs & Integration:	REST APIs, API Integration, Firebase
Back-End & Data:	PHP (project experience), Node.js, MongoDB
AI-Assisted Development:	Claude, Claude Code, Claude AI Agents, Cursor, ChatGPT, Gemini, Agentic Workflows, Prompt Engineering, AI Code Review
Version Control:	Git, GitHub
Additional Programming:	C++, C#, Object-Oriented Programming (OOP), Angular

EDUCATION

Bachelor of Computer Science 2016 – 2020

Luxor University, Faculty of Computers and Information

Graduation Project: Sign Language Recognition | Graduation Grade: Excellent

CERTIFICATIONS

Prompt Engineering Course — Anthropic May 2026

INTERNSHIPS & TRAINING

Front-End Development Trainee — Information Technology Institute (ITI) Apr 2022 – Jul 2022

Technologies: React.js, Next.js, Angular, TypeScript, Node.js, Firebase, Tailwind CSS, Bootstrap 5

Front-End Development Trainee — Mahara Tech (ITI) Jan 2021 – Mar 2021

Technologies: HTML5, CSS3, JavaScript (ES6), React.js, MongoDB

IT Trainee — Information Technology Institute (ITI), Smart Village Jun 2018 – Aug 2018

LANGUAGES

Arabic: Native | English: Very Good
